

Heavy-duty Desktop Series

EFORT

The heavy-duty desktop robot series has a strong load capacity and a wide range of work, and is precise, efficient, flexible and compact, which can significantly improve production efficiency.

01 Highlights

The heavy-duty desktop series includes multiple versions with load/work ranges of 8kg/1.3m, 10kg/1.1m, and 12kg/0.9m, suitable for 3C, Automotive components, PV Solar, Li-ion battery, general and other industries.

It features high precision with a design that combines high rigidity and lightweight construction, achieving a repeat positioning accuracy of up to 0.02mm.

The robot has a compact structure with a fully enclosed IP67 design, occupying only 260mm*260mm of space and enabling deployment in narrow and confined spaces.

It also offers high efficiency with a standard door cycle time of 0.42s, and strong load capacity and wide work range.

The robot wrist has a higher torque, inertia, and rigidity, ensuring high performance.

02 Main Applications
